

Geraniol Insect Repellent Products

Bead Bags

Bead Bags

BugBand Insect Repellent Bead Bags contain Geraniol, a natural ingredient that repels insects. The plastic beads contain a high concentration of Geraniol, which is released slowly to form a protective vapor barrier in a given area. The highly concentrated fragrance beads are packed in an air-flow bag made of nylon mesh, which contains the beads, but allows air to pass freely.

Applications

Ideal for use in fan cabinets near food serving areas where sprays cannot be used or in air-vents to disperse the vapors into a room (also cars, trucks or buses). For window or wall air conditioners attach to center of clean air filter. In autos, trucks, airplanes and busses, place bags under seats, in air circulating systems and in ashtrays. At campsites place the bags in tents and campers. Place the bags on screened porches, patios and other outdoor enclosures. Use around pet bedding areas and kennels and anywhere insect repelling is desired.

Packaging

Bead Bags are packaged in the following configurations:

Blister Cards:

- 12 per box
- 12 per clip strip-2 strips per case
- 36 per Display- One display per case

Loose Bags:

- 24 Bags per Bucket-One Bucket per box
- 24 Bags Per Bucket-Six Buckets per box

Stock

- 88100
- 88024
- 88036
- 88220B
- 88220A
