

Geraniol Insect Repellent Products

Wristbands

BugBand Wrist Bands

The wristband is an ideal way to dispense the Geraniol insect repellent vapors for active outdoor lifestyles such as gardening, hiking, lawn work, fishing, hunting or many other activities. Many repellents are easily diluted or rinsed off with swimming or perspiration, but not this wristband-it just keeps working. The vapors from the wristband form a protective shield around the immediate area, keeping blood sucking insects a safe distance from the person wearing this convenient plastic band. The band is designed with a patented break-away strap that snaps if the band is entangled and pulls on the person's arm. The wristband is packaged in an innovative reusable plastic pot which can be used to store the wristband between uses. The wristband has an active life of up to 120 hours. This life can be preserved if the band is sealed between uses. The band can also be worn on belt loops, hatbands, fastened in tents, attached to baby carriages or applied to other areas where insects could be a problem. The band is recyclable so simply dispose of it and the pot with your plastic recyclable containers.
